

5           **USER INTERFACE INCLUDING MULTIFUNCTION FINGERPRINT  
            ROLLER AND COMPUTER INCLUDING THE SAME**

10                           **ABSTRACT OF THE DISCLOSURE**

15           A user interface including an at least partially transparent roller. The  
transparency allows the roller to be used as part of a fingerprint scanning system  
during fingerprint scans. The roller may also be used for other purposes during  
non-scanning periods. For example, the roller may be used in place of a  
conventional scroll key to control scrolling.
